INTELLECT
Technologies

Integrated global software solutions for freight forwarders and the shipping industry

Intellect Technologies is a designer of integrated software solutions to support operational needs of freight forwarders, NVOCCs, shipping lines and agencies.

Increasing customer productivity since 2005

IΛTELLECT
Technologies

Our mission is to provide excellent value to our customers in all global regions by offering high quality software products and services using best professional practices and leading technologies.

We are committed to developing products that are recognized as industry leaders by satisfying customer expectations for performance, reliability, and security.

Our mission: to exceed your expectations

INTELLECT
Technologies

Intellect offices

Intellect Technologies provides solutions to organizations located in all global regions. We staff our headquarters in NJ, USA, as the primary center for development and product support and supplement our operations from facilities in the UK and India.

How we serve our customers

IN**TELLECT**
Technologies

INTELLECT eFreight

A feature rich standard software application designed to satisfy the operations requirements for Freight Forwarders and NVOCCs.

INTELLECT eShip

A foundation application that includes the features and capabilities required by most maritime carriers, tailored to the final specifications of each individual customer.

INTELLECT eCustoms

A web based customer portal that provides e-commerce capabilities with Customs Agencies including USA for AMS, ISF, and AES.

Our solutions are customized to your needs

INTELLECT Technologies

Intellect Technologies has made the strategic decision to develop solutions suitable to support the needs of organizations of all sizes operating in a global market.

Developed using the tools and capabilities from Oracle, Intellect solutions can scale to any size offering unparalleled security and performance.

State-of-the-art technology, global connectivity

Functionally Rich – Intellect solutions are full function solutions providing the most demanded capabilities from Logistics Service Providers across all global regions.

Flexibility – Intellect solutions are designed to be the most flexible applications available. While maintaining global standard workflows, our solutions can be tailored to the branch and operator level.

Reliability – Using the world's leading technology platform, Oracle, Intellect solutions are fully web based 24X7 single entry applications.

Connectivity – Intellect solutions are implemented as fully e-commerce enabled hub applications offering complete connectivity with trading partners worldwide.

Value – Intellect is competitively priced with other existing solutions while generally providing greater flexibility, more capabilities, and higher quality customer support.
